WHY SPRING HILL'S MUMS ARE BETTER

From nearly 500,000 field grown chrysanthemums we select the most choice Mother plants for propagating. The cuttings are grown under artificial lights in sterilized soil and sprayed regularly with parathion. No finer, healthier or better plants are grown by anyone. We ship strong rooted or well established pot plants with solid ball of earth. Experience

proves these are the most practical, most reliable and most satisfactory plants to ship and plant. We plant the same plants in our fields each spring because they will produce by far the largest, healthiest, biggest blooming plants by fall. Each year we receive scores of letters complimenting us on our fine mum plants.

Spidery Thread-like FUJI MUMS

This interesting and increasingly popular class of novelty chrysanthemums have long cord-like quilled petals usually fish-hooked or spoon-like tips (see color pictures opposite page). The large blooms are graceful but of eccentric form. For extra large saucer size show blooms, leave 3 to 4 stems on each plant and disbud leaving only one terminal bud per stem, and fertilize. Varieties listed bloom mid to late October which is the earliest blooming date for Fuji mums. They make a most unusual showing in the garden and are excellent for bouquets and are favorites to win prizes at flower shows. We recommend winter protection in the North.

EVERGREEN DIGGING NOTICE

All evergreens for shipping fresh dug bare-root from our fields, wrapped in moist peat for more satisfactory and economical delivery. Large sizes balled in earth at same prices when you drive to nursery for cash and carry.

Put hole 1/2 full of good top soil. Pack firmly, seal well with water.

INSTRUCTIONS TO PLANT

Never permit roots to shrivel or dry out—PLANT IMMEDIATELY. Dig large hole, cover roots with rich topsoil, firm and soak well to settle soil around roots. Leave burlap on B&B evergreens; wet burlap soon rots.

HUGE HYBRID BLUEBERRIES

These big, luscious, marble size U. S. Dept. of Agri. hybrids are so good for eating fresh or delicious in pies, preserves and canned or frozen. The attractive shrub-like plants bear large clusters of mild, sweet fruit, easy to pick. They require no spraying and it is easy to grow blueberries if you make the soil acid and mulch heavy with peat, sawdust, oak leaves or any organic matter. A heavy mulch is better than cultivation. If soil is sweet or alkaline mix thoroughly with aluminum sulphate. We send sufficient aluminum sulphate with each

order for planting 1st year. Plant no less than two varieties for pollination. The plants grow for a lifetime and have handsome glossy foliage that changes red, gold and orange in fall. Beautiful pink-tinged white fragrant blooms on compact bushy plants make blueberries ideal for hedges or landscaping your yard. Hardy throughout U. S. A. You will get more and larger fruit if the old canes are pruned so the plants keep new shoots coming. On good blueberry land a gross sales of \$1,200 per acre selling wholesale is the average income.

EARLIBLUE—23F17—New Improved early ripening hybrid.

BLUERAY—23F18—Best new mid-season ripening hybrid.

HERBERT—23F19—Finest new late ripening hybrid.

ROSA MULTIFLORA The Miracle Living Fence

31H11—Protect and beautify your property. A cheap practical fence that grows so dense no person or animal can get through.

The plants grow 6 to 8 ft. tall and 5 to 7 ft. wide, are tough and fast growing. Covered with a multitude of white flowers in spring; loaded with attractive red fruit in fall and winter which provides food for wild life.

Recommended by U. S. Soil Conservation service for livestock farm fence and for factories, parks, estates, institutions, large lawns, etc., that wish to keep animals and trespassers off their property. Present recommendation by U.S.D.A. are to plant 1 ft. apart in a single row for tight fence. Ornamental hedges can be planted 18 inches apart and kept

trimmed to desired height. North of Milwaukee there is danger of winter injury. The general use of rosa multi-flora and its value is proven for cheap fence, game management, property protection, windbreaks and erosion control to soil and crops, will last for generations.
